

INTRODUCES...

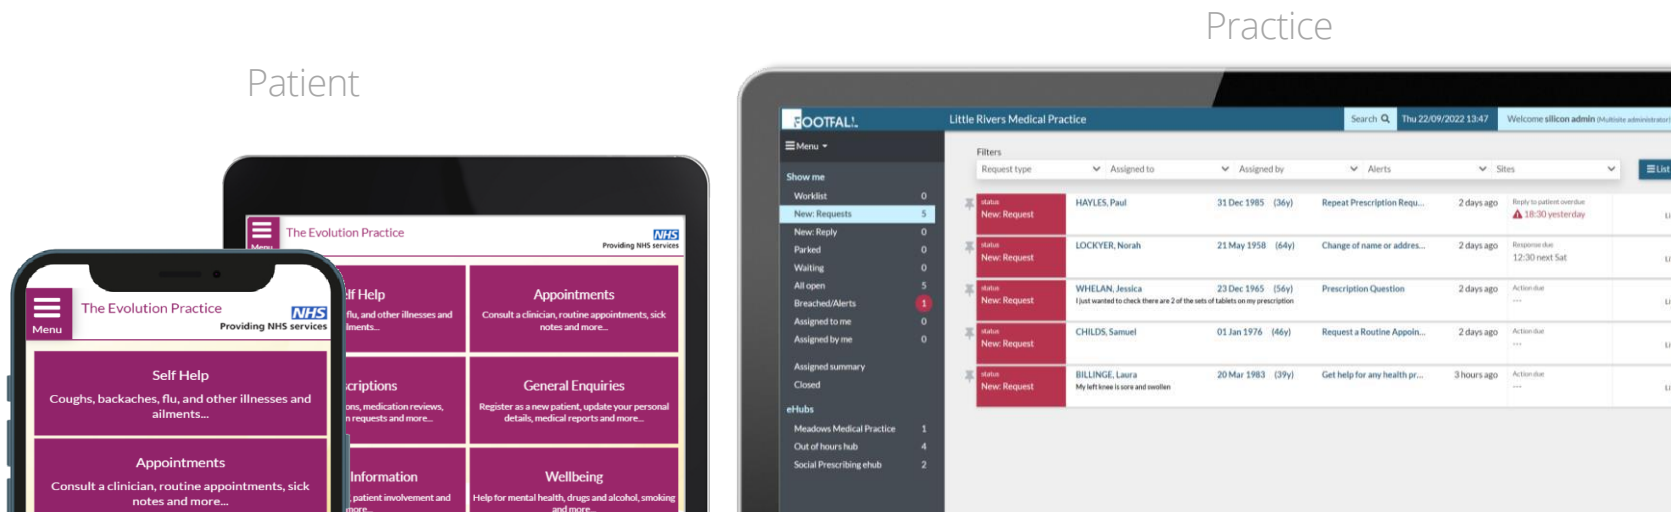

The Digital Practice

Helping Practices to Manage Patient Demand

HOW IS FOOTFALL ACCESSED?

Patients access FootFall through the practice website. Patients are invited to select a tile according to the task they want to complete.

Practices access the patient requests via a dashboard.

PATIENT SELF SERVICE

Patients are guided through simple decision trees for many administrative functions, avoiding the need to phone or visit the practice.

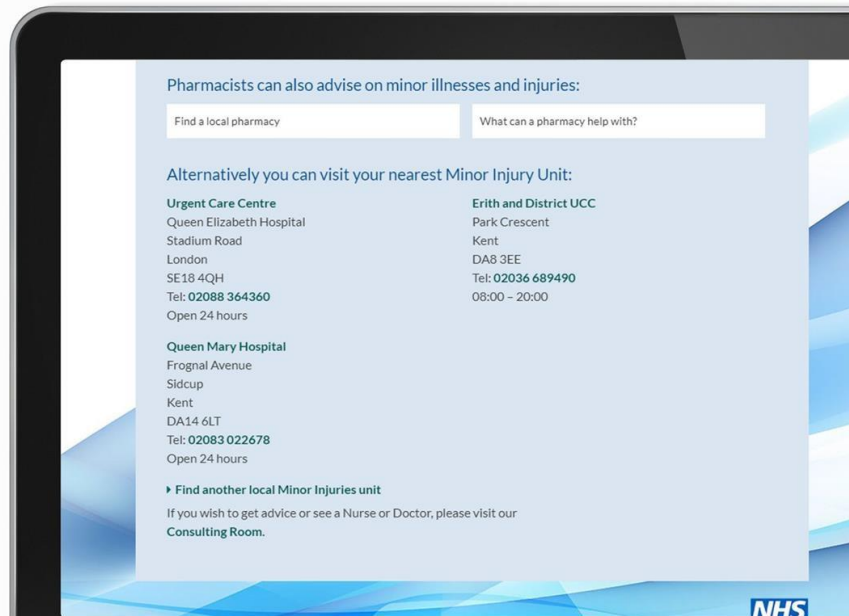

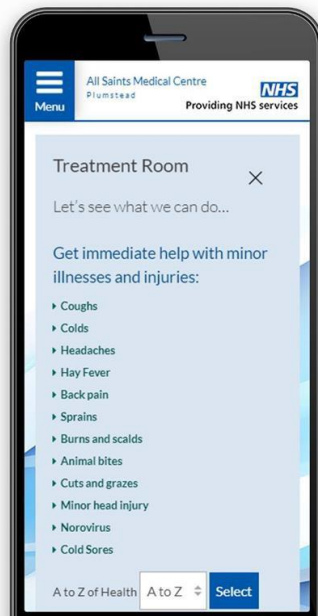

PATIENT SELF HELP ON MINOR HEALTH PROBLEMS

Gives latest NHS content on top 12 minor health problems.

Patients are advised when to call 999 or go to A&E.

Directs patients to local pharmacies and MIU's where appropriate.

ONLINE CONSULTATIONS

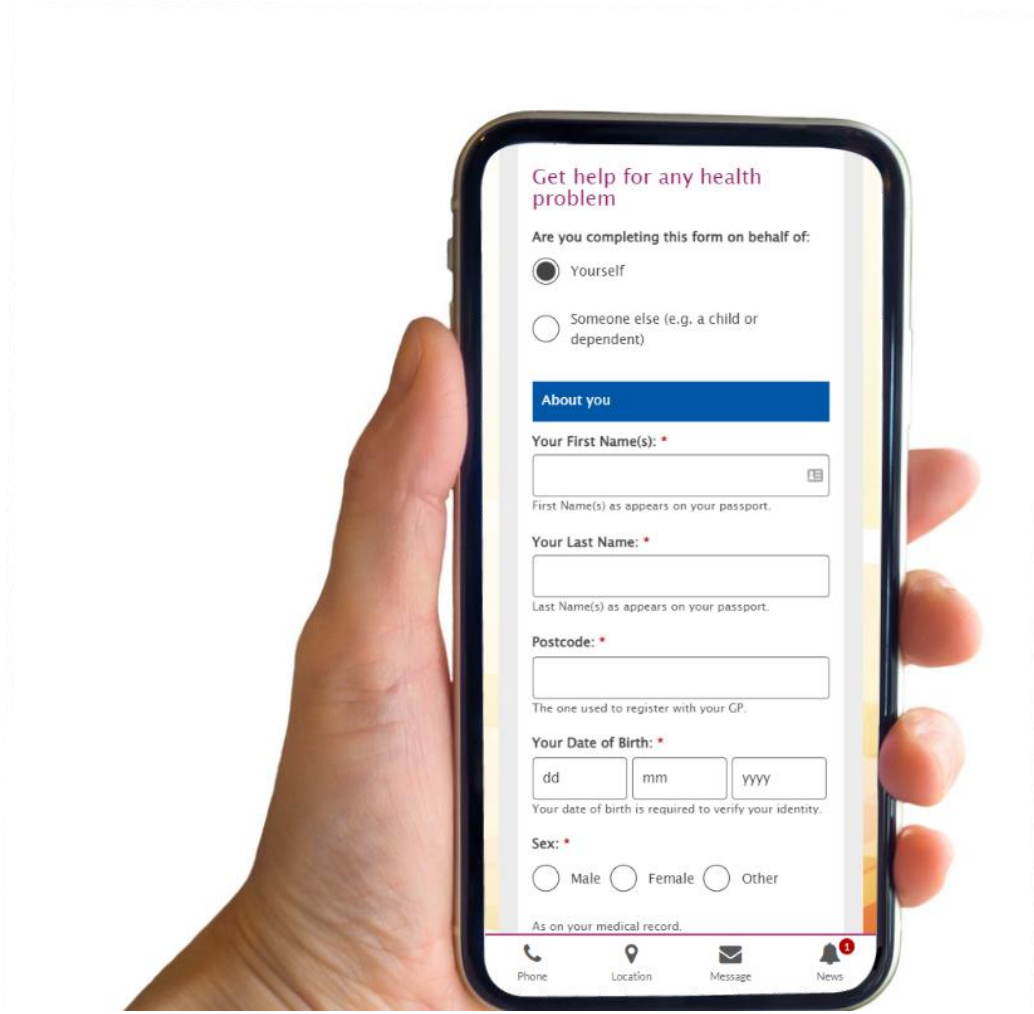

Includes the ability to engage with doctors as well as nurses, pharmacists and receptionists.

Permits two-way conversations.

Patients can send documents and photos.

The practice can reply with practice documents such as medical letters and guidance leaflets.

Provides a complete audit trail for every activity.

PATIENT CENTRED ONLINE CONSULTATIONS

Tailored consultation forms guide patients to:

- ▶ Include their symptoms, history and concerns about their condition.
- ▶ Choose their preferred method of receiving practice responses, i.e. text, email or both.
- ▶ FootFall includes online reviews for many conditions including UTI, Asthma, COPD.

Required field(s) are indicated by *

Phone Location Message News

DASHBOARD

Bring order to patient requests with one comprehensive system

Handle all patient requests in one system.

Coded data can be sent to the clinical system EMIS.

Customisable dashboards according to roles.

Supports total digital triage.

Full reporting and searchable audit trail with individual access control.

Over 40 request types currently supported such as administrative and health review forms.

CLINICAL SYSTEM INTEGRATION

FootFall Connect

Send episodes directly into the patient record with FootFall Connect EMIS integration.

Use floating desktop toolbar to perform quick actions:

- ▶ View the active patients FootFall requests
- ▶ Send the patient a message (SMS and email)
- ▶ Start a video consultation

DASHBOARD

Staff Efficiency

Prioritise and monitor patient requests as they travel through the practice so you never lose track of them.

Provide quick and consistent response to common questions by creating pre-formatted replies.

Quickly view and triage request without having to open the full consultation.

Pin requests to keep track of requests and indicate to others that this request is being worked on.

Incorporate information from library into patient responses to support patient self-help or send private documents such as a sick note.

Automatic PDS verification for patient and proxies.

DASHBOARD

Flexibility

Assign requests to individuals or groups.

Prioritise requests with notifications when tasks are due

Use in-built statuses that suit your workflow to identify the stage that the request is in.

Send replied to patients online or via SMS

Allows you to restrict patient access to forms in periods of high demand or optionally when the practice is closed.
